A- Step by step process

FIRST: TURN OFF YOUR WALLET

1- Make a copy of your [wallet.dat](#)

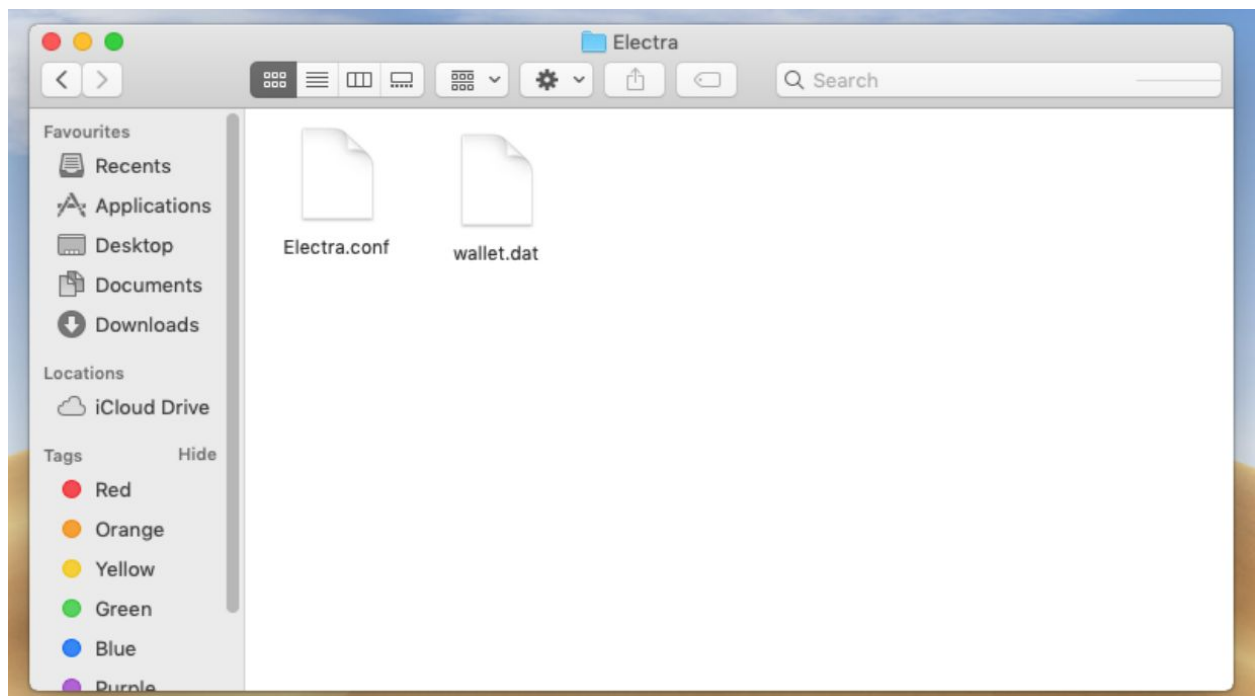

a- Click desktop and click on Go to folder
or press: Shift ⌘ + Command ⌘ + G

b- Type : [~/Library/Application Support/Electra](#) and then click on Go

c- Electra folder is open, copy and paste the file [Wallet.dat](#) in a safety location, best in other hard drive, usb key, ect...

2- Delete everything in this Electra folder EXCEPT [wallet.dat](#) and [Electra.conf](#)

Your Electra folder should look like this:

3- Uninstall your current wallet (Remove only the wallet from **Application**)

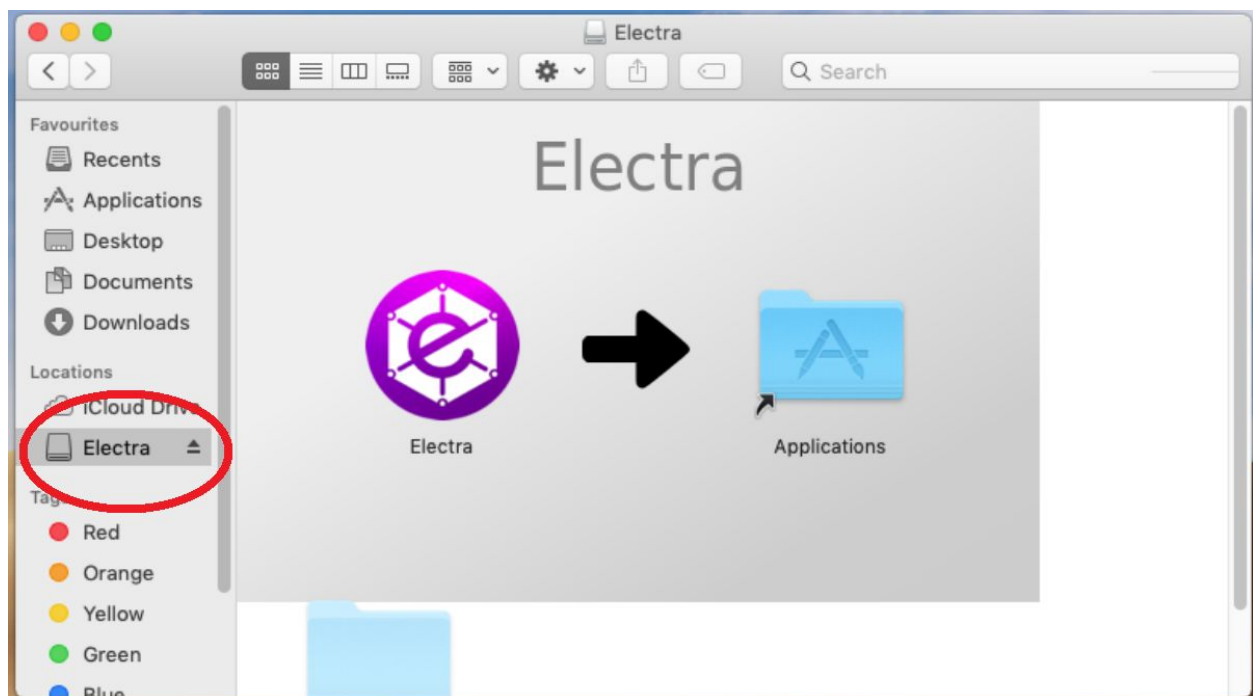

4- Download the **High Sierra and Mojave Wallet**:

https://github.com/Electra-project/electra-core/releases/download/2.0.0/Electra-Qt_HighSierra_and_Mojave.dmg

5- Run the **Electra.dmg**.

Once the image is mounted, it will not open itself (you may have a 'volume' error or just nothing displayed).

You must access it via the Finder:

6- Drag and drop the **Electra** to **Application** folder.

7- Your wallet is updated and ready to sync.

*If you are stuck during the sync on a block, you can use the **Bootstrap** to speed up the process:

B- Current graphic issue of the wallet

You may have a few graphic bugs but It doesn't affect the wallet.

It's only related to the background of some menu:
